

YASHVEER SHUKLA

Full Stack Developer | AI & Automation Engineer

[Portfolio](#) | [Gmail](#) | [LinkedIn](#) | [GitHub](#)

PROFILE SUMMARY

Full-stack developer and AI engineer with hands-on experience building end-to-end ML pipelines, cloud-deployed applications, and automation systems using AWS, Python, and React. Passionate about applying AI and automation to solve high-impact problems in healthcare technology, with a focus on building reliable, production-ready infrastructure.

TECHNICAL SKILLS

Cloud & DevOps	AWS (EC2, S3, Lambda), Git, GitHub, Deployment & Hosting
Machine Learning & AI	CNN-based Image Classification, Supervised Learning, TensorFlow, Keras, Scikit-learn, Model Evaluation
Automation & Pipelines	Python Scripting, Process Automation, API Integration, Error-Handling & Resilience Design
Web Technologies	React.js, JavaScript, HTML5, CSS3, Bootstrap, Responsive Design
Programming Languages	Python, Java, C/C++, SQL
Data & Tools	NumPy, Pandas, Jupyter Notebook

EXPERIENCE

- Machine Learning Mentorship Trainee** — *LaunchED Global x VIT-AP* Mar 2025 – Apr 2025
- Engineered a CNN-based image classification model during an intensive ML mentorship program, applying a full supervised learning workflow from data preprocessing through model evaluation.
 - Evaluated model performance using confusion matrix analysis and accuracy metrics to identify key areas for tuning and improvement.

PROJECTS

Batch-Processing Video Automation Pipeline

- Engineered a local Python orchestration system that parses structured JSON datasets, automates audio synthesis via the Edge TTS API, and dynamically retrieves image assets for content generation.
- Automated video post-production using MoviePy — including auto-cropping, zooming, and media stitching — to generate standardized 1080x1920 vertical-format videos at scale.
- Designed a resilient hybrid fallback architecture with robust error-handling and retry logic, maintaining pipeline uptime despite third-party API rate limits and intermittent network conditions.

KrishiMitra AI — *Smart India Hackathon (SIH) 2025*

- Architected and deployed a multilingual AI advisory platform on AWS (EC2, S3, Lambda), delivering real-time, serverless weather alerts and crop-planning guidance to farmers across Odisha.
- Built a voice-to-text conversational assistant supporting local languages, reducing reliance on typed input to improve accessibility for rural, non-technical users.
- Designed scalable cloud storage architecture on AWS S3 to manage large agricultural datasets, enabling real-time data processing for hyper-local recommendations.

Quantum Key Distribution (QKD) Web Application — *Amravati Quantum Valley Hackathon (AQVH)*

- Developed and deployed a full-stack web application demonstrating QKD-based encryption protocols, implementing secure key generation, distribution, and verification logic.
- Engineered real-time cryptographic data handling using JavaScript and modern web APIs, applying network security principles directly relevant to safeguarding sensitive healthcare data transmissions.

Naya Savera NGO Website

- Designed and deployed a responsive website from scratch for a Deoria-based non-profit (naya-savera.co.in), covering wireframing, UI design, hosting, and custom domain configuration.
- Implemented an SEO-optimized structure and metadata, increasing organic visibility for the organization's key initiatives.

EDUCATION

VIT-AP University, Andhra Pradesh, India	— B.Tech in Computer Science and Engineering, CGPA: 8.27/10	Sept 2024 – Jun 2028
CIS, Sikar, Rajasthan	— 12th Grade	2024
JMSS, Deoria, U.P.	— 10th Grade	2022

CERTIFICATIONS

- [AI Fluency: Frameworks and Foundations — Anthropic](#)
- [Generative AI Essentials — IBM](#)
- [Java Programming — Intellipaat](#)
- [Responsive Web Design — freeCodeCamp](#)
- Machine Learning Mentorship — LaunchED Global
